

# Trampa Rotatoria tipo ROTA GRID

## Trampa de Barras Giratorias Potencias desde 9000 Gauss. Alta efectividad al remover partículas ferricas

### Construction & materials data

En Acero Inoxidable 304, o 316L

Limpieza Semi Automatica , Automatica

### Summary of important specifications

- Multiple pneumatically cleaning magnetic bars  $\varnothing 25$  mm mounted in a rotor
- The entire rotor – including the drive motor – can be manually slid out over a robust guide
- Magnet quality: neodymium N-52, 11,400 gauss on the  $\varnothing 25$  tube
- Materials housing + rotor: AISI316(L)
- Rotor mounted in hydroformed, completely smoothly polished housing
- Door gasket silicone EC1935 / FDA
- Robust, hygienic quick-release clamp for closing separator
- Schmersal safety switch - monitors whether the separator is closed and switches the motor on/off when the door is closed/opened
- Detection switches check for the presence of the magnets in the product channel so that production can be started again safely after a cleaning cycle
